- All reports exportable to various Microsoft format eg. Excel, Csv
- Report by Visitor's currently still in the premises for Fire Drills selectable
- Password protected to secure user
- Network Capability through sharing of folder
- Sticker Print with picture
- Security at your Fingertips
- User friendliness assured & certified by senior users age group 55 and above
- Program by Local Engineers and customizable to **PDPA** requirement or any propose ideas. **Windows 11 ready**.

In most organization, visitors are still signing in through scribbling their name in Visitors Record Books or by Security Personnel on their Occurrence books.

With Visitor Identifications Management System, visitors electronically scan their ID, Driver's License and Work Permit, key in the required details immediately or later to avoid long queue of check in process. The database to the individual is captured into the system once the registration is completed.

Simplifies and cut down tracing period thus enable the security to act immediately in case of emergencies. Speed up check in process and reduces waiting time. Enhance productivity and efficiency of security personnel and allows effective deployment.
